

Cosmo Films Commissions a New CPP line and a metalizer

New Delhi, Feb 2nd, 2018- Cosmo Films, a global leader in films for packaging, lamination and labeling applications has announced commissioning of its second Cast Polypropylene (CPP) Line and fourth metalizer, both having annual capacity of 7500 MT. With installation of these new lines, the company's annual CPP films capacity will go from 1800 MT to 9300 MT and the metalized films will increase from 15000 MT to 22,500 MT.

These new lines have been commissioned at company's existing facility at Karjan, near Vadodara, India which already houses BOPP lines, extrusion coating & chemical coating lines and a metalizer. The 2.85 meter CPP line is five-layered and is designed to produce speciality films (especially barrier films) for various packaging applications. The line has the possibility to have multilayer combinations. The new 2.85 meter metalizer is equipped with advanced control monitoring system and closed loop auto deposition control system. The facility at Karjan has been developed keeping future expansions in mind.

Speaking on the development, Mr. Pankaj Poddar, CEO, Cosmo Films Ltd said, *"Apart from being a focussed BOPP player over the years, we have made significant efforts in recent times to become a complete film solution provider with more and more films to offer along with various value added services. Moreover there has been a dearth of organised CPP players in the market and with the expansion of our capacity; we shall be better suited to serve our customers. The new lines are also expected to help increase the overall margins and volumes to some extent."*

About Cosmo Films Limited

Established in 1981, Cosmo Films Limited today is a global leader in speciality films for packaging, lamination and labeling applications. Its films offerings include biaxially oriented polypropylene (BOPP) films, cast polypropylene (CPP) films and soon to be offered biaxially oriented polyethylene terephthalate (BOPET) films. Today, the company is the largest exporter of BOPP films from India and is also the largest producer of thermal laminating films in the world with plant cum distribution centres in the U.S, Korea & Japan and global channel partners in more than seventy countries.
