

## NEPRA RESOURCE MANAGEMENT PVT LTD's initiative

Let's Recycle is the largest waste management solution in India. We strategize to bring in environmental solutions that can help the communities and organizations to become sustainable.

With the wide spread network of recycling facilities our business adapts to meet the needs of various customer groups by tailoring, scheduling and organizing our operations to suite their requirements. Since 2012 we have helped 500+ customers become greener.

Let's Recycle has formalized the Indian unregulated and unorganized waste management sector by sourcing waste from the marginalized waste pickers, ensuring long standing relationships by providing fair and transparent prices. We have impacted the lives of 5000+ people from bottom of pyramid and are committed to do in future.

We are the only waste management organization in India to have developed an Enterprise Resource Planning (ERP) system to track and monitor our activities so as to make the system more authentic and efficient. With our constant endeavors we plan to divert 30000 MT of waste from the landfill by 2020, up from 373MT in 2012, when we just started the operations. A part of this will be accomplished by expanding the business footprint in other cities and the rest by increasing the portfolio and becoming a one stop shop for all waste management solutions.

## WASTE DIVERSION CERTIFICATE

We provide a certificate of diversion, mentioning the diverted waste and mitigated carbon emissions, based on real time web badge

- **Address**

206, Kalasagar Mall, Opp. Saibaba Temple,  
Sattadhar Cross Road, Ghatlodia,  
Ahmedabad, Gujarat 380 061 India
